STRICTLY NON-SECTARIAN

RESULT OF MUNICIPAL ELECTIONS IN MACLEOD

Very little interest was taken in the municipal election in Macleod Monday, February 13, when only 71 ratepayers went to the poll to record their votes. The poll opened at 10 o'clock and closed at 7 o'clock. E. F. Foster Brown was returning officer.

There were five candidates for four vacancies. Three councillors retired and one vacancy was caused by the resignation of Fred Morris, who is leaving town. The result of who is leaving town. The result of the voting was as follows:

Claude Tweed, machinery agent, 61; Alex. McLeod, blacksmith, 59; Wm. O. Hoodless, merchant, 59; C. W. Stevens, contractor, 49; A. T. Leather, financial and real estate agent, 48. There were two spoiled ballots.

Messrs. Tweed, McLeod and Hoodless are elected for two years, and Mr. Stevens for one year. Messrs. Tweed and Hoodless are new men to the council. Mr. Leather has been a member of the council for many years and was a most efficient chairman of the works and property committee.

MORTGAGE SALE

Pursuant to the Order of His Honour Judge A. M. MacDonald made the 30th day of January A. D. 1928 in a certain action wherein John James Dunbar is the Plaintiff and George Tanner is the Defendant, the following lands and premises, namely:

The South West quarter of Section twelve (12), Township ten (10), Range twenty-six (26), West of the 4th Meridian, in the Province of Alberta. Reserving unto His Majesty, His Successors and Assigns all mines and minerals. Will be offered for sale by public auction on the 18th day of February A. D. 1928 at the hour of twelve o'clock noon, at the Court House at Macleod, in the Province of Alberta.

The property will be offered for sale subject to a reserve bid and subject to the reservations contained in the grant from the Crown and in existing certificates of title, and subject to all rates and taxes due and owing on the said land.

TERMS OF SALE, 10% cash at the time of the sale and the balance within 60 days with interest at 6% from the time of sale.

FURTHER PARTICULARS may be had from the Auctioneer or from the undersigned solicitor.

J. W. McDONALD, K.C.,
Macleod, Alberta,
Solicitor for Plaintiff.

JOSEPH HICKS, Esq.,
Macleod, Alberta,
Auctioneer.

CARD OF THANKS

Mr. W. O. Hoodless and May wish to thank all friends and acquaintances for kindness shown in their recent sad bereavement.

COOTE URGES WEED CONTROL—ASKS MINISTER OF AGRICULTURE TO HELP CURB WEEDS ON DOMINION LANDS

Ottawa, Feb. 15.—During the consideration of a vote in the House of Commons last night of \$375,000 for seed, feed and fertilizer control, G. G. Coote, U. F. A., Macleod, informed the minister of agriculture that in Western Canada there was quite a problem resulting from the growth of noxious weeds on government lands.

He suggested that the minister might spend a little of the money provided by the appropriation in eliminating those noxious weeds from Dominion government property. The farmers themselves could not go on the Dominion lands to do this work.

Hon. R. B. Bennett, opposition leader, said that Mr. Coote had raised a very important point. He urged the department of agriculture to endeavor to co-operate with the provinces in such matter.

The minister said that the question of overlapping the administration of the department with provincial affairs was being eliminated. The minister of agriculture took of the efforts being made to combat the weed problem.

The vote then carried. It would appear that Mr. Coote was referring to the sow-thistle infestation on the banks of the Old Man river west of Macleod.

CLOSE GRAZING OF PASTURES

The question of the influence of the stage of growth on the composition of grasses has long been under investigation and it is now a well established fact that young grass is much more nutritious than that approaching maturity. The chief difference in composition lies in the variations of fibre and protein content; the percentage of fibre increasing and that of protein decreasing with maturity. Not only is the fibre content markedly lower in the young grass but such fibre as is present is more digestible than that of the ripe grass. A consideration of the stages of protein content shows strikingly the greater value of young grass. For example, the percentage of protein in Timothy "just speared" is double that at the "seed fully formed" stage. Knowledge of these variations in composition has long been the basis of the advice that it is good practice to cut grass for hay very shortly after the formation of seed. In recent years the possibilities of considering young grass as a furnish of protein in the ration has been suggested.

In several countries, notably Germany and England a system of pasturing known as "close-grazing" has been tried out, in recent years. By this plan it was expected that grass lands could be made to furnish a fairly high protein concentrate in the form of very young grass in continuous supplies. This is done by cropping the area fairly close, moving the animals, heavily fertilizing with nitrogenous fertilizers, e. g. nitrate of soda, and allowing the grass to grow, say, ten days or a fortnight, before again cropping. A preliminary experiment conducted by the Division of Chemistry, Experimental Farm, Ottawa, during the past summer, to obtain Canadian data on this subject, has given some interesting results. Of four plots, one cut weekly; one, fortnightly; one, every third week; and one as hay, the plot cut every third week furnished the largest amount of digestible dry matter and of protein.

Close-grazing has its practical difficulties and the adoption of a scheme calling for the systematic cropping of areas, with the attendant expenditure for fertilizer, labor and fencing, would not be economic on farms generally in Canada. Nevertheless, the principle is sound and adaptation of the scheme may be found which would meet local conditions and at the same time increase the feeding value of our pastures.

PUBLIC SCHOOL HONOR ROLL FOR JANUARY

Grade I. (Senior)—1 Moira Law, 2 Billy Freek, 3 George Pinder, 4 Frankie Wood.

Grade II. (Junior)—1 Betty Sutherland, 2 Dorothy Toogood.

Grade III. (Senior)—1 Billy Hutton, 2 Clarence Dunbar, 3 Albert Clarke.

Grade IV. (Junior)—1 Molly Crowe, 2 Herman Haugen, 3 Marjorie Lantinga.

Grade V. (Senior)—1 Florence Bremner, 2 Dorothy Folkins, 3 Tommy Ripley.

Grade VI. (Junior)—1 Barbara Jones, 2 Alberta Ferguson, 3 George Baker.

Grade VII. (Senior)—1 Doris Russell, 2 Beatrice Burrows, 3 Gladys Clarkson, 4 Colin McLeod.

Grade VIII. (Junior)—1 Margaret Morensh, 2 Earl Dixon, 3 Phyllis Carr, 4 Ethel Emerson, 4 John Bothwick.

Grade IX. (Senior)—1 Hilda Clarkson, 2 Irene Kennedy, 3 Phyllis Maddick, 4 Irene Smith.

Grade X. (Junior)—1 Isobel Morensh, 2 Viola Wintemute, 3 Harold Rands, 4 Catherine Roaling.

Grade XI. (Senior)—1 Vera Burrows, 2 Madeline Grier, 3 Ruby Taylor, 4 Marjorie Pharo.

Grade XII. (Junior)—1 Eileen Freek, 2 Violet Wilson, 3 Wilma Freek, 4 Addison Clement, 5 Laura Hamilton, 6 Viola Tobiasson.

Grade XIII. (Senior)—1 May Hoodless, 2 Dorothy Pinder, 3 Florence Lantinga, 4 Dorothy Hillard, 5 May McLeod, 6 Eileen Bawden.

Grade XIV. (Junior)—1 Walter Greensk, 2 David Cooney, 3 Bob Toogood, 4 Jack MacDonald, 5 Helen McNab, 6 Hugh Young and Connie Reid.

A PARADISE FOR CRIPPLED CHILDREN IN ALBERTA

An event of great significance to the province of Alberta took place Monday evening January 16th when His Honour Lieutenant Governor Egbert officially opened the new wing of the University Hospital, Edmonton, named the Junior Red Cross Wing for Crippled Children. Before a large and representative gathering His Honour declared that he knew of no other work in any line which he could so conscientiously commend to the sympathetic support of the people of Alberta, as the Red Cross work amongst the crippled and sick children of the province.

With His Honour on the platform supporting the strong appeal for a better understanding by the public of the great and varied humanitarian services of Red Cross in Alberta were Dean Kerr of the University, who brought cordial greetings from President Tory; Mr. D. M. Duggan, M. L. A., who spoke on behalf of the Red Cross Executive thanking the citizens of Edmonton for their splendid support in the form of endowment, mentioning specially the Juniors great work of raising funds through their school branches; Mr. A. C. L. Adams, the new Commissioner for Red Cross in the Province who occupied the chair and acted as announcer for the C. K. U. A. Broadcast concert program which formed the first part of the program.

The story of the \$9,500.00 collected for the construction of this splendid wing reads like some remarkable dream coming true, for by small sums here and tiny donations there, the boys and girls of the City of Edmonton have demonstrated to the world at large that they have a keen realization of their duty to "those less fortunate."

Added to their weekly efforts in schools have come the annual event of tag days and Christmas seal selling campaign, all successfully showing that where there's the Red Cross will, there is the Red Cross way.

The beautifully appointed wards with their thirty little cots are mute evidence of many people's thought and practical sympathy. Endowed cots speak of the desire of Service Clubs of Edmonton sharing the joy of maintaining as their guests those who are laid aside by disease and infirmity. One who bore the burden of "Tiny Tim" tells the world that the Dickens Fellowship desires to do its part to help "One of the least of these." Great credit is due to Mr. E. A. Corbett who during the past year acted as Red Cross Commissioner, for his achievement in establishing in Alberta this splendid new wing.

ABNORMAL AND DISCOLOURED SEED WHEAT

If seed wheat contains abnormal or discoloured kernels a first class crop cannot be grown to maturity even under ideal climatic conditions. Weather conditions, such as prevailed in the prairie provinces of Canada during the harvest time of 1927, tended to bring out these abnormalities and discolourations in grain to a more marked extent than usual.

Shrivelled, shrunken and pimpled or blistered wheat should be avoided. Shrivelled or shrunken kernels may be the result of badly rotted wheat or may be indicative of the presence of a fungus within the seed, while frozen wheat has a pimpled or blistered seed coat. A mummified kernel which is white to gray in colour is typical of the presence of a very serious and destructive fungus disease.

Discolourations such as green, pink and black are also very common. Green kernels denote lack of maturity, while the cause of the distinct pinkish discolouration so often found is not definitely known. Blackened kernels are typical of the presence of a number of different wheat parasites. If the tip of the germ and is inky black in colour bacteria are very frequently the cause. If blackening is evident at different places on the seed coat, fungi, which cause root diseases of cereals, are often present.

During the last two years experi-

MACLEOD YOUTHS PRESENT MINSTREL SHOW—35 BOYS TAKE PART IN SNAPPY SHOW—RAISE MONEY FOR Y. P. WORK

Roger Hunt and Jack Griffin are coming in for great praise over the success of the boys' minstrel show, which was staged before a packed house in the Macleod town hall on Thursday evening February 9. It was evident that nothing had been neglected in the training of the 35 boys who took part, and the audience was kept in almost perpetual laughter.

Edgar's orchestra with Ernie Charlton at the piano accompanied the songs and dispensed jazz in volume sufficient to guarantee against any dull moments between the scenes. Tuxis boys, Trail Rangers and Explorers from the Macleod United church combined in this effort to raise money for the province-wide campaign that is on this week.

In the opening scene, Stanley Rands filled the position of interlocutor in an able manner and Ernest Rands and Ivor Brooks occupied the end seats. Negroes and negro children threw themselves with zest into the program of songs, jokes and stunts which gave the audience a lively hour of amusement. Among the stunts worthy of note were the "pill" stunt, in which a doctor administered a pill to a sick patient which resulted in an explosion and the patient disappears.

Harold Rands pulled a "crying baby" stunt in which he recited James Whitcomb Riley's "I Ain't a-going to Cry no More." Little Jim St. George and Jim Cooney staged a midwest reproduction of the Tunnely-Dempsey fight. The "kitchen" orchestra called forth an energetic demand for an encore.

A series of short scenes followed of a humorous nature, including a railway crossing scene, in which the main actors were John Jackson, David Cooney and Bill Irwin. A sleeping car scene was participated in by Eric Crowson, Donald Sutherland and Frank McNab. A dialogue entitled "Writing a Poem" presented by Ernest Rands, Ivor Brooks, Chris Cooney and Bill Irwin, and a humorous pantomime introduced Eric Crowson in the roll of a flapper, with Ivor Brooks, Stanley Rands, Walter Greensk and numerous subordinate characters. Ernest Rands had an act of his own in which he mystified the audience in his role as an Italian musician, and a rousing chorus in which all the boys had a part sent the people home feeling that they had had a splendid evening's entertainment.

The boys are very grateful to their leaders for their untiring work in the preparation, to the members of the orchestra and Ernie Charlton for donating their services and to Phil Brooks for the very unique advertising stunt which could not fail in securing a bumper harvest.

Experiments have been conducted at this laboratory to study the importance of such abnormalities and discolourations as are mentioned above, and our results signify that it is a very serious practice to sow wheat of this kind. In all cases germination is reduced and the plants which survive are very often weak and sickly in appearance. By sowing such wheat the farmer in many cases may introduce disease producing fungi into his land.

Wise and careful selection of seed wheat is of the utmost importance. Ordinary seed cleaning methods such as are used by the average farmer will suffice to remove badly shrunken and very light kernels, but many remain, and if these comprise even a small proportion of the seed it should be avoided. Doubtful samples of seed grain may be sent to any of the Dominion Experimental Farms or to this laboratory for examination.

ST. ANDREW'S PRESBYTERIAN CHURCH

Sunday, February 19th, 1928: The pastor will preach at both services.

S. S. and Bible Class at the close of the morning service.

7:30 p. m.—Subject, "Paradise Regained."

Ladies Aid, Monday afternoon at 3 o'clock.

Prayer meeting, Wednesday at 8 p. m.

C. G. I. T. on Thursday at 7:30.

Mission Band will meet on Friday afternoon just after 4 o'clock.

Choir practice Friday at 7 and 8 o'clock.

Rev. A. C. Wishart, Minister.

UNITED CHURCH

Rev. W. H. Irwin, Minister.

Regular service Sunday morning, at 11 a. m. and 7:30 p. m.

Sunday School meets at the close of the morning service.

Election classes on Monday at 4 p. m. and 8 p. m.

Brotherhood supper and concert at 6:30 p. m. on Tuesday evening.

Taxis boys meet at 8 p. m. Tuesday.

Choir practice on Friday evening.

CHRIST CHURCH (ANGLICAN)

Services, Sunday, February 19th, 1928:

8 a. m.—Holy Communion.

11 a. m.—Holy Communion and Sermon.

12:15 noon—C. G. I. T. and Senior Bible Class.

2:30 p. m.—Sunday School.

7:30 p. m.—Evangelism and Sermon.

Rev. F. Randall Powell, Rector.

Well, if a life of easy luxury destroys nations, perhaps it is a kindness to leave the war debt undisturbed for posterity.

Perhaps some European countries seem crooked, but you can't stay straight trying to get on your feet while sleeping on your arms.

ADAPTATION OF CEREAL VARIETIES FOR DIFFERENT CONDITIONS

Since varieties of grains may differ appreciably in structure, quality, earliness, resistance to disease and in the many other characters which we wish to distinguish them, it is logical to expect that they may perform differently under different conditions. This being the case, it is economically important that farmers ascertain the variety that is best suited to the conditions peculiar to their own particular farms. At the present time it is rather difficult to decide which is the best variety for a given district in view of the number to choose from. There is only one way to find the best variety and that is to test several of the most promising ones under similar conditions in adjoining plots for at least three years. This is not a difficult task and requires only a small piece of ground—not more than a square rod or two. The small amount of time required to sow, take notes on and harvest the crop will be more than repaid in the interest and information it will provide not only to the grower, but to his neighbours as well.

The Experimental Farms of the Federal Department of Agriculture are encouraging this "local variety testing work" and now have a large number of co-operators working with them testing out different varieties in different parts of Canada according to a simple plan. It is

hoped ultimately, with the mass of information available from this co-operative scheme, to plot or zone the districts where certain varieties give the most promise. It may be possible for instance, to determine more definitely the Marquis zone, the Garnet zone, the Renfrew zone or the zone where some other variety may be grown with greatest profit.

Since conditions within a given zone may vary considerably farmers would always be well advised to do a certain amount of testing, especially as new promising productions by reliable institutions are reported.

AN EARLY SWEET CORN

For a number of years the Experimental Farms have been endeavouring to bring out improved varieties of table corn. By cross breeding the Golden Bantam with corn of earlier varieties, a new sort, called Banting has been brought out that is particularly adaptable to northern areas, but equally useful in all parts of Canada. It not only possesses the delicious qualities of the Golden Bantam, but it has a longer season of growth, inasmuch as it can be brought to maturity two weeks earlier than the old variety.

"Has that female author any future?" "Oh, yes; she has a wonderful past."

The office cynic's wife has found a book on child psychology very helpful. She uses it as a paddle.

It takes a little nerve to ask the banker to renew that note again, but fortunately he's a collector of antiques.

JAILS FOR SALE

Jails are a drug in the real estate
market in Great Britain.

Twenty fully-equipped prisons, in-
cluding condemned cells and gallows,
have been offered for sale by the
Government at bargain prices, and
so far no offers have been received
for these unique properties.

Since the close of the war, there
has been a phenomenal decline in
crime in Britain, and this happy con-
dition is a striking testimony of the
administration of law, and also to
the growing respect for law which
has so long been characteristic of
the British race.

Britain's empty prisons are the
concrete and indisputable proof of
the salutary effect on public morals
which has resulted from the stern
and impartial administration of
justice.

Speedy trials end in speedy judg-
ments, and the proceedings are not
allowed to be travestied by solemn
considerations of sentimental ap-
peals for leniency and acquittal on
the grounds of insanity, sex, or
other specious pretenses.

The efficiency of the British
system is in such sharp contrast to
that of the United States that the
juries of the latter country are
driven to despair. And this is not to
be wondered at, for the American
courts have become the arena where
in skillful arguments on legal
technicalities obscure the main
issue, and too often lead to a com-
plete subversion of justice.

British courts are operated for
the sole object of protecting society
from the violence and depredations
of criminals, and no more convincing
evidence of the success of the
system can be furnished than the
empty prisons that the government
is anxious to get off its hands.

THE YOUNGER VANDERBILT

It is impossible not to feel a great
deal of sympathy for young Corn-
elius Vanderbilt as he struggles to
pay off the \$1,250,000 debt his ven-
ture into the publishing business has
brought him.

Vanderbilt, born to riches and
social position, could have been an
idler all his life. He could have de-
voted himself to one of those deligh-
tful careers that some rich men find
so enjoyable—yachting, polo, travel
and so on. But he didn't. He wanted
to do something, to be a worker.

It cost him his fortune. His family
is indignant with him. One gathers
that there is a feeling that he has
somehow disgraced the family name.

We don't agree. It seems to us
that he has added a good deal of
lustre to it.

PEACE IN INDUSTRY

The conference in London between
the duly authorized representatives
of four million trades unionists and
the leading industrialists of Britain
has for its object the formulation of
plans for the promotion and main-
tenance of peace in industry.

Such a conference is an encourag-
ing sign of the evolutionary forces
that are changing industry from a
system of hostile groups, eternally
at war, into a friendly co-operation
of management and labor as the
joint partners in all phases of the
operations which make for profitable
production.

The disastrous consequences pro-
duced by the coal strike are still
painfully evident. Six months after
the beginning of the strike it was
estimated that the loss of trade had
then reached the large sum of \$1,
500,000,000. The loss has been vast.

THE BUREAU OF STANDARDS

United States is spending annual-
ly two million dollars on a research
bureau of standards. The same thing
on a minor scale applies to Ottawa.

If the findings of these bureaus
were made available to the public
at large, it is estimated that the
knowledge collected by them, show-
ing what has and has not value,
would enable the public to save at
least one billion dollars annually.

And why should not that informa-
tion be made available to the public?
Why should the public not know
what is the cost and value of the
goods it purchases?

What greater service could be
rendered by the governments to the
people than that of giving intelligent
ideas as to how to get their money's
worth?

Under modern mass production,
enormous amount of goods can be
manufactured for an incredibly
small amount of money. The

problem, then, is to pass on to the
public the great benefits of mass
production, what is useful, and
what is not; what has value, what
has not; how, quickest and cheapest,
can these goods be passed on to the
people?

Wages and salaries that are being
received by the masses are suf-
ficiently high, if the public, instead
of being bewildered in a sea of ex-
travagant and fraudulent values, is
shown by a bureau of standards
what goods have merit and worth,
and what have not. The public could
then get its money's worth.

Higher wages and shorter hours
may be important, but to labor
unions and labor members of govern-
ment there is nothing half so
important as to see that government
bureau of standards' knowledge is
made available to the consumer.

TELL IT TO WASHINGTON

Under the title "Canadian Trade,"
the Seattle Post-Intelligencer has
the following to say editorially:
Canada, with a population of less
than 10,000,000, was this country's
best customer during 1927.

For the first time, Canada dis-
placed the United Kingdom as
America's chief export market.
Moreover, Canada, during that
period, was the heaviest producer
of imports into the United States,
ahead of Japan and the United
Kingdom.

These facts carry their own moral.
They point to the United States the
direction in which its destiny and
its prosperity lie, so far as foreign
trade is concerned.

Our business and our opportunity
are with the countries of the West-
ern Hemisphere. One Canadian is
of as much business value to us as
four Britons.

This growing consciousness of
Canada, among the American people,
is encouraging. But until this con-
sciousness is translated into econ-
omic action, it is not going to do
Canadians much good.

Canadians and Americans mix
freely. The two countries have ex-
tensive social and diplomatic inter-
course. But what real life can Can-
ada have with a country from whom
we buy more than \$550,000,000
worth of goods every year, but who
in turn shuts out our manufactured
products with impassable tariff
walls?

INSTRUCTIVE PROGRAM AT THE STANDOFF W. I.

The monthly meeting of the Stand
Off Women's Institute was held last
week at the home of Mrs. W. E.
Young and proved to be a most
interesting and enjoyable meeting.
These institute meetings are now
looked upon as a bright spot in the
month for the farm women of the
district. The institute has only
been organized for about nine
months, and practically every
woman in the wide district is a
member. Sickness or exceptionally
bad weather is the only thing that

keeps the members from attending
the meetings.

An instructive program was pro-
vided for this meeting consisting of
a paper by Mrs. Geo. Row, "Practi-
cal Hints on General Health"; read-
ing by Miss Edna Johnson; current
events by Mrs. Ward, and a paper
by Miss Rose Killoran, teacher,
"Social Side of Country Life." The
financial statement of the nine
months was read at this meeting
and showed a balance on hand of
over \$30. Refreshments were served
by the hostess.

ARDENVILLE NEWS

The Ardenville U. F. A. local held
their annual meeting on February
2nd, the election of officers being as
follows: President, J. M. Shield;
vice-president, A. Burdidge; Secre-
tary-treasurer, E. E. Britton; direc-
tors—A. S. Bodgener, T. Chester, J.

Cocklan and G. Robertson.
On February 22nd a debate on im-
migration will be held. This ought
to be interesting as it is one of the
big topics of today.

On February 8th, Mr. Rands, our
wheat pool delegate, gave us a very
interesting address on wheat pool
matters, he having secured several
new contracts at the meeting. Mr.
G. Stewart of the Macleod pool
elevator accompanied him. Lunch
was served at the close of the meet-
ing.

We are glad to hear that Mr. and
Mrs. Chester, who have been sick,
are on the mend.

Tom Bailey resumed threshing
operations during the past week.
Wesley Wood returned home the
other day after visiting in the East.

Environment fixes the degree of
a man's importance. In Mexico the
orchid is a weed.

That the interest aroused in the New Chevrolet has been well merited is indicated by these first
photographs of this latest addition to the light car field. The smart sport cabriolet, with its folding seat
and disc wheels, is shown in the upper right-hand photograph. In the centre is the sturdy Chevrolet
one-ton truck chassis, while at the lower right is the coach model, the body of which is five inches longer
than formerly. Insets are: upper left, the massive new radiator and heavy full crown fenders; right,
the powerful and clean-cut motor of the new line, with two-port exhaust and complete enclosure; lower
left, a view of one of the four-wheel brakes. The New Chevrolets, which are to be reduced in price, are
to be available at once. They are longer and roomier than previous models.

This advertisement is not published or displayed by the Alberta Liquor Control Board or by the Govern-
ment of the Province of Alberta.

BUY AT HOME Spend Your Money in Macleod

Purchases representing thousands of dollars are lost to
us, to our trade, to our clerks and employees, to our
laborers and artisans, to all the people of Macleod who
exist on the products of their work. This money, if
spent at home, would help to recreate Macleod finan-
cially, give a wider field of activities in business, would
be helpful to every resident of this town.

If we purchased regularly from local merchants, this
money would circulate in Macleod in a welcome manner.
Our merchants merit our patronage; it is to our inter-
est, and the duty of all of us to encourage the local
merchant. He is one of us, he lives among us, he has
the right to be encouraged by us, he is anxious to have
our custom, and to give us satisfaction. We should un-
der all circumstances give him preference, price for
price, quality for quality. And nearly always the price
that our local merchant asks is, if we compare the qual-
ity, just as cheap as that of the outside merchant.

Never purchase merchandise by catalogues from for-
eign houses before assuring yourself that you cannot
procure the same articles, of the same quality (and
frequently of better quality) at the same price from
your local merchant.

OBITUARY

MRS. HOODLESS LAID TO REST

St. Andrew's Presbyterian church, Macleod, was filled to capacity Thursday afternoon, February 9, for the funeral service of Mrs. Marian Reid Hoodless, wife of Wm. O. Hoodless, proprietor of the Speedway Service Station and Garage, who died early on Tuesday morning at the Macleod hospital after a few days' illness. The service was conducted by the minister of the church, the Rev. A. C. Wishart.

There were over thirty members of the Royal Purple Lodge (Elks) present from the lodges of Macleod and Granum. The late Mrs. Hoodless being an active member of the Macleod lodge, the members turned out to show their respect and esteem for the departed sister and their sympathy for the bereaved family. The large crowd that was present in the church and standing outside, also the lengthy cortege which followed the remains to the cemetery, testified to the respect in which Mrs. Hoodless was held by the people of Macleod and district. The sympathy of the whole community goes out to the sorrowing husband and little daughter, May, who is 12 years of age.

Mrs. Hoodless, who was 42 years of age, came to Macleod in 1910 with her parents, from Elgin, Scotland. She leaves to mourn her demise, besides her husband and daughter, two sisters, Mrs. V. Ray Baker of Macleod, and Mrs. Bert White of Sullivan, B. C., and one brother, Alex. Taylor, farmer at Schuler, Alberta. Another brother who came with the family to Macleod, George, paid the supreme sacrifice in the great war.

The pallbearers were Wm. Whitworth, Robt. Hamilton, C. McGladery, Norman Grier, Wesley Shield, Ed. Greenwood.

Following is a list of those sending floral tributes:

Husband and Daughter, Sister and Brother, Ray, Ina and George, Mr. and Mrs. W. Currie, B. P. O. E. No. 129, I. O. O. F. No. 4, O. O. R. P. No. 28, Finn, Jimmie and Ralph, Mr. and Mrs. H. Winter, Mr. and Mrs. Shields, Mr. and Mrs. Jas. Smith, Mr. and Mrs. H. V. Clarke, Mr. and Mrs. Jas. Hartley, Mr. Tom Bremner, Mr. and Mrs. J. W. McDonald, Mrs. Marks and Norvil, Mr. and Mrs. Dufour, Mr. and Mrs. Ramsbottom, Mr. and Mrs. R. D. McNay, Mr. and Mrs. N. Grier, Mr. and Mrs. W. Hunt, Mr. and Mrs. Hout, Grade 7 Public School, Mr. N. S. Kirk, Mr. W. Whitworth, Mr. and Mrs. W. G. Andrews, Macleod United Church Ladies Aid, Mr. and Mrs. H. McLean, Mr. and Mrs. R. McLean, Royal Purple No. 24 Granum, H. B. Carson, Lethbridge, Goodyear Rubber Co. Calgary, Canadian Legion B. E. S. L., Ernie Charlton, Mr. and Mrs. E. Greenwood, Mr. and Mrs. Percy McGregor, Mr. and Mrs. J. Morrison, Mr. and Mrs. J. Pringle, Mr. and Mrs. R. A. Hamilton, Mr. and Mrs. Alex. McLeod, Mr. and Mrs. Richard Jones, Mr. and Mrs. A. T. Leather, Mr. and Mrs. Wallace Hovis, Mr. and Mrs. Geo. Pearson, Mrs. D. W. Davis, Miss Barbara Kennedy, Miss Grace Donahue.

J. STEWART CLARK STILL MYSTERY MAN OF ALBERTA RAILWAY PUZZLE MEDFORD, ORE., CAN THROW LITTLE LIGHT ON PROMOTER WHO WOULD BUY E. D. AND B. C.

Mystery still surrounds J. Stewart Clark who has been creating railway news in Alberta for the past month or more, first with his announcement of a road from Lethbridge to Peace River and on to Stewart, B. C., and then on Monday with his astonishing offer of \$19,200,000 cash for the E. D. and B. C. railway.

Who is the new "railroad builder" and whom does he represent?

The Herald has been endeavoring through a number of channels to get some tangible data on the mysterious Mr. Clark but little light has been shed on the gentleman and the interests that are thought to be backing him. He gives his address as Medford, Ore., but the Medford Daily Mail-Tribune, in answer to a query, replied: "Clark does not live here. About a year ago he was here negotiating for right of way for railroad to the coast which has never been consummated. Don't know who he is and he never made known whom he represented."

There are those who believe Clark represents the Great Northern Railroad and perhaps other U. S. rail interests who are casting wistful eyes on the rich northern hinterland of Alberta and British Columbia and the adjacent Alaskan territory. The opening of the far north—today in the public eye more than ever before—by rail with a direct route from Stewart, on the Portland canal, to the Peace River, Edmonton and south to the American border probably via Lethbridge is a scheme that has long been considered and articles that have been appearing in New York and Toronto financial journals lend color to the belief that there is more behind the project than appears on the surface.

And Mr. Clark's name has been linked with these stories. Whether there is any foundation to this claim remains to be seen—Lethbridge Herald.

If you're boy doesn't believe in fairy tales, don't worry. He may never be a good idealist, but at least he won't be an alienist.

RADIO IN THE FAR NORTH

There has just come to hand a Hudson's Bay Co. Diary from Sik-inik Post at Port Leopold. This is evidently the most northerly of the Hudson's Bay Co.'s Posts. It is about 700 miles above the Arctic Circle and is located in Somersetland at the western end of Lancaster Sound. It is about 51 degrees west and ap-

proximately 74 degrees north. It is slightly northwest of Pond's Inlet. You will be able to easily locate this on the map.

KDKA ranks by far their best station, and there is a considerable amount of interesting material in this diary about the Westinghouse Stations, and also some excellent expressions of gratitude. They also pay glowing tribute to KFKX at Hastings, and send their thanks to the performers, and they wish especially to thank Miss May of KFKX. Following is a quotation from one of these expressions of thanks:

"I am sure that the Westinghouse Stations do not half realize the pleasure and comfort which we derive from listening to these messages coming through, and how they help us to keep cheerful and content through the long winter and especially through the period of darkness."

The most remarkable portion of

the diary is that they hear stations in Mexico, France, London, Aberdeen, Dublin and all over the United States and Canada, including the Atlantic Coast, Pacific Coast and the Gulf of Mexico, as well as Cuba.

Regarding England they remark, "We get quite used to hearing Big Ben chime out the hour of signing off." It appears that if anyone down here in civilization got any such reception they would never be able to go to sleep from talking about it, and the best stuff of it all is, that all of this reception is being heard on an old Canadian Westinghouse three-tube, single circuit regenerative RC receiver of a vintage of nearly five years ago.

Think how insulted the bride's mother would be if the groom's parents wept.

Very few habits are bad habits. They just seem that way because of the company they keep.

Dave O'Leary of Macleod was the guest of Mr. and Mrs. C. Arthur of Brockton for the week end.

Tom Smith of the Boston Hat Company was a visitor to Macleod this week.

Indian Agent Arthur of Brockton was a business visitor to Macleod this week.

J. J. Macdonald of Lethbridge was in Macleod on Wednesday attending the B. R. T. Annual ball.

Miss Olive Young has returned to Macleod from a vacation spent with her grandparents at Crossfield.

Mrs. N. W. Dilatash of Waterton Lakes was a visitor with Mrs. Dillingham on Wednesday.

George Pearson, who has been confined to his bed with pleurisy for the past few weeks, is now well on the road to recovery.

The Hon. Archie McLean was visiting his ranch for a few days last week. He left on Sunday for Calgary and Bassano.

Mrs. C. H. Gilroy and Mrs. W. V. Price are delegates to the W. A. Convention at Calgary this week, leaving for that city on Wednesday morning.

The Scarlet and Gold girls held a very successful dance on Friday evening last at their club rooms in the barracks. The music was furnished by Mrs. Huntley and J. Brenner. A real good time was had.

Mrs. H. Little spent last week with Mr. and Mrs. Jack Flury of Didsbury. On Saturday last she returned home accompanied by Mrs. Flury, who will spend a week or so here with Mrs. Little.

Miss Rachel McLeod who has been convalescing at her home in Macleod from an attack of scarlet fever contracted in Calgary, will shortly return to her duties as nurse at the Holy Cross Hospital in Calgary.

The Mission Band of St. Andrew's church will be held in the church Annex on Friday afternoon at 4 o'clock and will be in keeping with Valentine's day, and in charge of Mrs. Tripp.

Mr. and Mrs. E. H. Haug of Waterton Park were visitors to Macleod on Wednesday. Mr. Haug returned to the lakes the same day while Mrs. Haug will remain in town for a short visit with her parents, Mr. and Mrs. Sargeant Webb.

The following parties visited Lethbridge on Saturday evening last and attended the initial performance of the Dumbells in that city: Jean Ringland, Margaret Road, Gladys Conney, and Messrs. Jack Church,

Bruce Cummings, H. Platt, Geoff. Young and Mr. Tregillis.

H. L. Melish was a visitor to Macleod this week.

Tony Macdonald of Brockton was in Macleod on Saturday last.

A meeting of the congregation of the United Church was held on Monday evening last to discuss the matter of inviting the Rev. W. Irwin to stay another year as minister in Macleod, and by a unanimous vote the invitation was extended for him to remain.

The Fifth Annual International Day of Prayer, under the auspices of the Women's Missionary Society, will be held in Christ Church (Anglican) on Friday, February 24th, 1928, at 3 o'clock in the afternoon. All women who are interested in missions are invited to attend.

Mrs. T. S. McLean and Mrs. J. T. Doney represented the Macleod United Church W. M. S. at the Third Annual Presbyterian held in Lethbridge Feb. 8th and 9th. The Lethbridge Presbyterian met their allocation and had a surplus of more than \$200.00, while the Macleod Auxiliary went over the top with a surplus of \$8.00.

At the annual business meeting of the Junior Branch of the Women's Auxiliary of Christ Church, which was held in the Parish Hall on February 10, under the supervision of Mrs. Gilroy, the superintendent, the following officers were elected for 1928: Roberta Perry, president; Dorothy Hilliard, first vice-president; Gladys Gilroy, second vice-president; Miss C. Bloomer, secretary-treasurer.

Automobile insurance rates are higher, and it's the dealer's fault. He should have allowed a trade-in value equal to the amount insurance companies allow for a "stolen" car.

Fifty cents worth of material, plus \$2 worth of style, plus \$35 worth of reputation, and you have a \$37.50 hat.

"Plumber mistaken for robber," says a headline. What do you mean, "mistaken"?

WEDDING BELLS

DOWNIE-WATSON

Banked with ferns and spring flowers, the chance of Christ Church, Edmonton, made a pretty setting for the marriage on Tuesday evening of Margaret McNichol, daughter of Mr. and Mrs. Alexander Watson of Edmonton, and Mr. John Alexander Downie, son of the late George Bennet Downie and Mrs. Downie of Selkirk, Scotland. The Rev. J. M. Conyn-Ching conducted the ceremony and the wedding music was played by Mr. J. Barrett.

Making a charming picture in a wedding gown of cream French lace, with a bodice of Spanish lace, and filmy veil of Brussels net worn coronet fashion with orange blossoms, the bride was given in marriage by her father. Her shower bouquet was of ophelia roses and freesias.

Miss Helen Watson was her sister's bridesmaid, wearing a pretty frock of chiffon velvet and cream lace with touches of lavender flowers. She carried Liddle carnations. Mr. William Watson supported the groom.

Following the ceremony a reception was held at the home of the bride's parents, Mrs. Watson receiving the guests in a gown of black georgette over gold, with corsage of violets.

Mrs. Downie's travelling costume consisted of a frock of rose bell-tone, a wrap of grey duvetyne with fur trimming and a small hat of rose felt. The bridegroom's gift to the bride was a fox fur, and to the best man a fountain pen.

Mr. and Mrs. Downie left for the coast on their honeymoon and on their return will make their home at Gleichen.

HAY-DAVIS

North Hill United Church was the scene of an attractive and interesting wedding on Tuesday evening, January 31, when Miss Bea Davis of Macleod became the bride of Mr. Clayton Hay, Carbon, Alta., Rev. J. Rex Brown reading the service.

The bride, who was attended by her sister, Mrs. E. G. Stiff, was charming in a semi-tailored frock of crepe georgette in navy, with touches of scarlet, with a close-fitting hat to match, with which she wore a corsage of carnations and sweet peas.

Mr. Stewart Hay was best man. After a short honeymoon Mr. and Mrs. Hay will make their home in Baintree—Calgary Herald.

CONNERS-McNEE

The marriage of Mr. Samuel Connors of Coalhurst and Miss Helen Phillips McNeen of Lethbridge was quietly solemnized at St. Andrew's Presbyterian Manse Macleod on Monday, February 13th by Rev. A. C. Wishart. The happy young couple will take up their residence at Coalhurst.

So a western school is teaching girls to walk. Sending them out flivvering with persistent patters might do for a short course.

Ideas must be imparted while kids are young, but can you imagine a small boy getting a thrill playing with toy pacifiers?

Normal times are those in which people who buy land expect to pay for it.

Macleod's Little Foto

Baby's likeness always remains young in our memory, and in a good characteristic photograph. This is baby's studio and we will register that happy little trick of expression you loved at first sight.

Patriotism: The conviction that the thermometer on your back porch is the only one that tells the truth.

REACH & COMPANY, Ltd.

DEPARTMENTAL STORE — DRY GOODS — CLOTHING — BOOTS AND SHOES — UNDERWEAR — FLOUR — GROCERIES — VEGETABLES — CONFECTIONERY

We are happy to tell you that stocktaking is finished and money is not plentiful neither are collections as large as could be wished. This will be a year of economy and retrenchment. To catch the money floating around it will be necessary to give you bargains and tempt you in many cases at less than cost.

DRY GOODS
We must slash with the pruning knife. No reasonable offer will be refused. What we want is money, and lots of it to make up for the past season.

BOOTS AND SHOES
for Men, Women and Children are always on the move. At the latest excuse that any line is out of style, out she goes to the slaughter market—ticketed with plain figures. It is remarkable the quantity that we have sold that way. But that is better than staying on the shelves, to be a temptation to the dust and moth.

SUMMER UNDERWEAR
Watson's and other makes have given up the fight in Lisle and Cotton goods. So we must sacrifice Vests, Silk and Wool Combinations, Drawers, Bloomers and everything of a cottony parentage.

ONE THOUSAND
Ladies' Linen Collars, that used to be worn with a natty tie and blouse, we chucked into the furnace. Next week ask to see our Belgian and French Kid Gloves the loveliest kid we ever saw.

REACH & COMPANY, Ltd.
